## Career Objective

Motivated and detail-oriented Manual QA Tester with 1 year of hands-on experience testing web and mobile applications. Skilled in creating test cases, executing test scenarios, identifying bugs, and ensuring high-quality deliverables. Eager to contribute to a dynamic QA team and grow expertise in software testing processes.

#### Quick Guide

- Strong backend development experience using Python (Django) and PHP (Laravel)
- o Solid understanding of backend logic, RESTful APIs, and MVC architecture
- Basic knowledge of **DBeaver** for working with relational databases like MySQL or PostgreSQL
- o Familiar with HTML, CSS, and JavaScript for basic front-end integration
- Good communication skills and ability to collaborate effectively with cross-functional teams

#### Education

Gandhidham, Gujarat
2022 - 2025
Gandhidham, Gujarat 2021 - 2022
Gandhidham, Gujarat 2019 - 2020

## Experience

Manual TesterToDo IT ServicesBooking SystemSep 2024 - Jun 2025

- Experienced in manual testing of booking systems, ensuring backend logic efficiency and accurate calculations across core modules like pricing, availability, and reminders.
- Perform functional, load, and performance testing to validate system stability and behavior under various real-world conditions.
- Skilled in using the network tab (DevTools) to verify that correct data is being sent and received between the frontend and backend services.
- Apply a user-centric mindset to design critical test cases that mimic real booking scenarios and edge cases.
- Strong attention to detail in validating API responses, server logic, and transactional data accuracy.

# Manual Tester Intern EInvite (Digital Invitation)

ToDo IT Services Feb 2024 – Aug 2024

- Performed manual testing on a digital invitation platform where invitations are transformed into personalized websites.
- Responsible for testing customizable templates, ensuring correct rendering, responsiveness, and content accuracy across devices.
- Conducted UI/UX testing, validating design consistency and user experience across desktop and mobile platforms.
- Tested payment gateway integrations, verifying successful transactions, error handling, and backend confirmation flows.
- Carried out mobile app and web application testing to ensure smooth performance, responsiveness, and cross-browser compatibility.

#### **Projects**

#### QR Menu System

- Designed and developed a contactless QR Menu System, enabling customers to instantly access restaurant menus by scanning dynamically generated QR codes, reducing physical menu handling by 100
- Integrated a Django admin panel for restaurant staff to easily manage menu items, categories, and pricing—cutting menu update time from 30 minutes to under 5 minutes.
- Automated QR code generation using qrcode and Pillow, enhancing customer convenience and reducing staff workload during peak hours by approximately 40
- Improved overall service efficiency and hygiene compliance, aligning with post-pandemic dining standards.
- o Tools Used:Python Django, Django Admin Panel,HTML,CSS and JavaScript

#### Daily Report Automation using Automa AI Python

- Developed an application integrated with Slack's API to automate retrieval of employee daily goals and recaps from specific channels.
- Automated validation and tracking of goal and recap submissions for each employee, replacing manual verification processes.
- $\circ$  Eliminated the need for manual data collection, saving approximately 2–3 hours per day in team management time.
- Implemented logic to compute total working hours based on message timestamps, improving accuracy in attendance tracking.
- Eliminated the need for manual data collection, saving approximately 2–3 hours per day in team management time.
- o Tools Used: Automation AI, Python Script and Slack

#### Attendmark

- Automated the daily retrieval of performance reports from Stackify using Automa AI, eliminating the need for manual browser navigation.
- Built a Python script to extract and filter relevant performance metrics, improving data clarity and processing speed.
- Integrated an automated email system to deliver customized reports to stakeholders, reducing reporting delays.
- Reduced manual reporting time from 30 minutes/day to under 2 minutes, saving approximately 10+ hours/month and significantly improving operational efficiency.
- o Tools Used: PHP Laravel, DBeaver and Slack

#### Technical Skills

Languages: Python Django, C, PHP Laravel, JavaScript

**Testing Skills:** Manual Testing, Test Case Designs, Defect Life Cycle, Regression Testing , Functional Testing , Bug Tracking and STLC.

Tools: Jira(basic), DevTools, GitHub

Programming:Python Django,PHP Laravel

Others: HTML ,CSS,JavaScript(For Basic UI Checks) strengths

- Strong analytical and problem-solving skills.
- o Good Communication and Documentation.
- Quick learner, disciplined and team-oriented.
